Hi John

EG4 is in the viewer under the surface water samples>DMG/DMG layer... It is listed as EG-4 which is probably why it didn't query for you (up Eureka Gulch).

Ditto for A24. It is listed as A-24 in the surface water samples>WQCD/WQCD layer...

Dan,

I was able to map 113 of the 115 sample locations you provided. I was not able to locate A24 or EG4. I used imagery and your descriptions to create A07A and A07B.

If you are able to provide me coordinates for A24 and EG4 I will add them to the feature class.
